Assunto: FW: message from CEN on HARMONI project survey

Dear Members,

Find below a message I was asked by CEN to forward to you; please forward it to your national members.

Kind regards

Karine DARI

Dear Sir or Madam,

Some of the principal challenges innovations or cross-sectorial solutions face in process industry are non-technological aspects as regulation or a lack of standardization.

HARMONI is a H2020-project which aims to unite all relevant stakeholders of the process industry in order to jointly propose solutions to overcome regulatory bottlenecks and standardization needs, which hamper their innovation processes. HARMONI identifies all issues projects and industries face when implementing innovations

Associação Nacional dos Industriais de Prefabricação em Betão

and provides recommendations to European regulatory authorities and to European standardization organizations.

We need your help to collect practical experiences of the industry that serve as a basis to develop solutions to non-technical barriers, which can be forwarded to relevant European authorities and standardization committees. Out of this reason, we encourage to you to answer the following surveys:

- *Standardization : https://docs.google.com/forms/d/e/1FAIpQLSen5ZjbWn9Ommqt7BQC_nd-sF2ckT3r69Dxan60B2RNpOFVJQ/viewform*
- *Regulation and other non-technological barriers:

Please send us your answer until the 05 March 2018.

Thank you very much; we really appreciate your help!

*Sincerely yours,
HARMONI team.*
